Multi Functional Printer

Combining the skills  
of many into one

Versatile multifunctional  
network printers for  
outstanding communication.

The Canon iR2016/2020 combines the skills of many devices into one space-saving multifunctional unit.

## Achieve so much more with so much less

To survive in today's competitive business environment you have to be flexible enough to cope with a variety of jobs. Sometimes all at once. We've designed the iR2016/2020 to work that way too. A compact, intelligent multifunctional communication device that can copy, print and fax, it's as dependable as you are.

### Whatever you need, wherever you need it

Handling the work of many in one compact solution, the 16 ppm\* iR2016 and 20 ppm iR2020 bring effective, confident communication to your business. Enhancing your document workflow and featuring a powerful controller for multi-task processing, they thrive in busy offices and sit comfortably in small spaces.

### Look your best

Present a professional image every time with the iR2016/2020. Print with outstanding clarity at 1200 dpi and produce high quality, double sided and stapled reports for distribution using the optional internal finishing device. Productivity can be enhanced further with an additional tray to separate print and copied output. Alternatively, an inner two-way tray for non-stapled collation can be incorporated for maximum versatility.

### An integrated communications hub

Businesses thrive on effective communication. Add the iR2016/2020 to your team and it will enhance yours, acting as a networked focal point of all document communication activity. Send urgent faxes, print sales reports or copy customer proposals using one cost-effective solution.

### Effortless network integration

Integration into your network is seamless across AS400, Linux/Unix and SAP environments, and using Mac or PC. Set up and management is effortless thanks to NetSpot tools, Canon's remote web-based device management software. Network printing at a crystal-clear 1200 dpi is enabled using Canon's advanced-performance proprietary printer language UFR II Lite. PCL printing is also supported.

### Space saving and scaleable

Compact it may be, but the iR2016/2020 can cope with some big challenges. With a choice of additional paper drawers, you can select the capacity that best suits your needs, up to 1,080 sheets, in a variety of paper sizes up to A3.

### Conscious of your pocket, conscious of the environment

Innovative on-demand fixing technology enables an energy saving sleep mode to be automatically initiated when the device is not in use. Once needed, the device is fully operational again in seconds - a great way to reduce energy consumption without affecting staff productivity. Benefit from further paper and cost savings with double sided copying and printing.

### Can I produce professional documents more efficiently?

With Canon's iW Publishing Manager software, you can easily merge documents from different Windows applications (eg Microsoft Word, Excel, PowerPoint). From this electronic 'master', you can edit, amend

and print your professional document with no time wasted on manual collating or finishing. More importantly you can save the settings applied to your document for future prints, therefore improving your overall efficiency.
